Katrina

This is the response ATSDR is providing to the media person they have been communication with.

“ATSDR is working with the U.S. Environmental Protection Agency to ensure actions are taken to prevent access to contaminated portions of the site and additional sampling is conducted to determine the extent of soil contamination of the Wilcox Oil site. We continue to work with nearby residents so they are aware of the potential site hazards and the steps they can take to protect their health. For more information about ATSDR, visit [www.atsdr.cdc.gov](http://www.atsdr.cdc.gov).”
